Continuation of 11. does NOT place the application in condition for allowance because: The arguments submitted by Applicant regarding the "polished concave bearing surface" as opposed to the term in the prior art of record of "machined" surface, are not persuasive. The term "machined" is defined by Dictionar.com (machined. (n.d.). Dictionary.com Unabridged (v.1.0.1) Retrieved October 25, 2006, from Dictionary.com website: http://dictionary.reference.com/browse/machined) as "to make, prepare,or finish with a machineor with machine tools". It is the position of the Office that polishing is a form of finishing. Further, it is claimed that the bearing surface is "configured to directly engage..." and "configured to substantially surround..." which is a recitation of intended use. Further, the bearing surface is capable of functionaing as claimed even if it may not implicitly be stated in the reference. Therefore, the rejection is upheld..
